

Computer Shop

Overview

The mission of the Computer Shop is to provide technical support for research, teaching, and administrative functions. Two IT Programmer/Analysts are on staff to provide electronic design and fabrication for custom electronics solutions to unique situations encountered in research projects. The staff has expertise in Macintosh, IBM clone computers, peripherals, printers, and network interfacing, including installation, setup, upgrades, demonstration, troubleshooting, repair, and modification services. The Computer Shop also provides design, development, and installation of local area networks, specifying hubs, network cards, cable types, and software. Consultation is provided to determine appropriate hardware/software solutions.

Services Available

All services are provided on an appointment basis. Business hours are from 8:00AM to 5:00PM, Monday through Friday.
